Good

\*per unit

- 5. CLARIFYING REMARKS: Am older and quite congested residential section of the city. In the eastern portion there are still a number of fine, old homes still maintained by first families but with their passing these are gradually giving way to apartment houses. Because of this trend, caution is advised in making loans.
- 6. NAME AND LOCATION HARTFORD, CONN. SECURITY GRADETHIRD AREA NO. C-E

## Home Owners Loan Corporation (HOLC) Residential Security "Redlining" Map and Area Descriptions

Hartford, Connecticut (including the towns of East Hartford and West Hartford) 1937

**Submitted By:** Submitted to MAGIC by Professor Jack Dougherty (Trinity College, Hartford CT), as part of the "On The Line" research project.

**Record Source:** Residential Security Maps of Hartford-West Hartford-East Hartford, Connecticut, 1937. Home Owners' Loan Corporation (HOLC), box 64, City Survey Files, Record Group 195: Records of the Federal Home Loan Bank Board, National Archives II, College Park, Maryland.

**Restrictions and Copyright:** This collection is "Unrestricted," according to the Archival Research Catalog for "ARC Identifier 720357" on the NARA website: http://www.archives.gov/research/arc/

## Abstract:

Beginning in 1935, the federal Home Owners' Loan Corporation worked with local mortgage lenders to evaluate the "trend of desirability" in residential areas in Hartford and over 200 other cities. The HOLC portrayed its appraisal report in a color-coded map with the highest grade (A) in green and the lowest grade (D) in red. This government agency considered not only housing conditions, but also the "social status of the population," and downgraded neighborhoods with non-white, immigrant, and poor residents. In later decades, these actions became associated with the discriminatory practice of "redlining."

As 2010, as part of the "On the Line" project, MAGIC and Professor Dougherty collaborated to digitize these historical resources and transform them into an interactive map. The appraisal report (on legal size paper) and two large folded maps (Hartford-West Hartford, and East Hartford) were scanned at the National Archives and then pieced together. Textual and numerical report data were entered into a spreadsheet, and the map was geo-referenced and digitized to create a GIS shapefile. The website featuring the interactive map and links to all of the source materials is located at: <a href="http://magic.lib.uconn.edu/otl/holc\_mashup.html">http://magic.lib.uconn.edu/otl/holc\_mashup.html</a>
